

BETTY LEE CARTER

Full-Stack Software Engineer

KNOXVILLE, TN 37917 (865) 684-9265 [CONTACT](#) | [PORTFOLIO](#) | [LINKEDIN](#) | [GITHUB](#)

PROJECTS

BLEEP [Visit Site](#) | [GitHub](#) *Lead Design and Programmer* October 2022

BLEEP is a 5 letter 'discover the word' app. I created it from top to bottom with HTML, CSS and heavy implication of JavaScript. It is designed with mobile use in mind.

BJJ STARS [Visit Site](#) | [GitHub](#) *Lead Design and Developer* December 2022

Designed with Java Script (EJS) and a SQL Database which employs multiple foreign keys. This site applies a real world application of helping Brazilian Jiu-Jitsu students connect with their instructors through an elegant star system. Front-End created with Bootstrap.

STITCH N BITCH [Visit Site](#) | [GitHub](#) *Front-End Developer and Co-Designer* February 2023

For all the crafters, this site is for you. Create a profile, save your favorite projects and connect with like-minded people. Front-end created with React, backend designed with Elephant SQL.

BREW [Visit Site](#) | [GitHub](#) *Front-End Developer and Co-Designer* November 2022

This site is both functional and pleasing to the eye. API calls bring up a specific brewery, or a wider search renders a list of breweries in that locale. This site utilizes EJS behind the scenes.

LANGUAGES

- HTML, CSS, JavaScript, ReactJS, Redux Toolkit, Node.js, Express, PostgreSQL, Elephant SQL and multiple front-end frameworks.

EDUCATION

DigitalCrafts, Atlanta – Computer Software Engineering Certificate

OCTOBER 2022 – FEBRUARY 2023, REMOTE
